

# Hritik Sharma

Software Engineer | Full-Stack JavaScript

✉ [sharmahritik8077@gmail.com](mailto:sharmahritik8077@gmail.com) 🌐 [Portfolio](#) 🐙 [Github](#) [in](#) [Linkedin](#)

---

## Summary

Full-Stack JavaScript Developer with experience building scalable web applications using React, Next.js, Node.js, Express.js, PostgreSQL, MongoDB, Prisma, and TypeScript. Experienced in API development, authentication, AI integrations, database design, and cloud deployment with a focus on clean architecture and production-ready software.

## Experience

### TechPlek Technologies

Full Stack Developer Intern

New Delhi

18 dec - 18 jun 2026

#### Project 1 : Shailshuta Logistics

**Tech Stack:** React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, React Query, Material UI, JWT

- Contributed to the development of a full-stack logistics management platform for administrators and customer
- Built and maintained scalable RESTful APIs using Node.js, Express.js, PostgreSQL, and Prisma.
- Designed and implemented shipment lifecycle workflows, business logic, tracking, validation, and administrative operations.
- Developed a comprehensive Role-Based Access Control (RBAC) system with JWT authentication and permission-based authorization.
- Integrated backend services with a React + TypeScript frontend, implementing dashboards, shipment management, customer management, and project management modules.
- Built responsive UI components using Material UI, React Query, Axios, React Router, and Context API.
- Collaborated with senior developers to debug production issues, review APIs, and deliver production-ready features.

#### Project 2: PDOOH (Digital Out-of-Home) Platform

**Tech Stack:** React, TypeScript, Node.js, Prisma, PostgreSQL, Raspberry Pi, Linux

- Developed backend services using Node.js and Prisma for the PDOOH ecosystem.
- Built React-based administration panels for device and content management.
- Optimized the Raspberry Pi media player by resolving rendering and layout issues.
- Implemented a custom boot interface and automated device provisioning workflow.
- Improved application stability, startup reliability, and overall device performance.
- Contributed to backend APIs and frontend features supporting digital signage management.

## Projects

### ToolStackAI — AI-Powered Full-Stack Developer Workspace

**Technologies:** React 19, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Tailwind CSS, React Query, NVIDIA AI, JWT, Docker

- Built a full-stack AI-powered developer workspace combining AI chat, PDF analysis, image understanding, code debugging, and productivity tools into a unified platform.
- Implemented streaming AI chat with custom tool-calling, enabling the AI to create tasks, manage projects, and store persistent user memories directly from conversations.
-

Developed a RAG-based PDF Q&A system using NVIDIA embeddings and a custom in-memory vector store with cosine similarity search for semantic document retrieval.

- Built multimodal AI features including image analysis, structured code debugging, and a persistent memory system that automatically extracts and stores user context.
- Designed a secure backend with JWT authentication, AES-256-GCM encrypted API key storage, Zod validation, modular service architecture, and usage tracking.
- Deployed the application on Vercel and Render with CI/CD, leveraging PostgreSQL (Prisma ORM) and React Que for scalable state management and production-ready performance.

## Skills

### Languages

JavaScript, TypeScript, Python(Beginner)

### Frontend

React.js, Next.js, Tailwind CSS, Material UI, React Query, Redux Toolkit, Context API, React Router, Axios, Responsive UI, Zustand

### Backend

Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Prisma ORM, Mongoose, Zod Validation, Middleware

### Databases

PostgreSQL, MongoDB, Prisma ORM, Mongoose, MongoDB Atlas, Supabase, Neon

### DevOps & Tools

Git, GitHub, Docker, Postman, Vercel, Render, Netlify

## Certifications

### MERN Stack Development

Ducat Pitampura

Learning the MERN stack at Ducat, working with MongoDB, Express.js, React.js, Node.js, JavaScript, HTML, CSS, and Tailwind to build full-stack web applications.

## Education

### Bachelor of Computer Application

2023 - 2025

GNIOT Institute of Professional Studies
